Bold: cost differs from the unique HILP baseline. Underline: lower time with matching recorded settings and trial/seed pairs. $\Delta\text{cost} = 100(C - C_{HILP})/|C_{HILP}|$; undefined for zero/missing/ambiguous baseline. Historical or mismatched timing is descriptive only; no speedup claim is implied.

pruningEF: experiments/grid/runs/pruning-pruningEF; 72 rows, 0 unsuccessful.

pruningEF: experiments/grid/runs/pruning-pruningEF; 72 rows, 0 unsuccessful.

grid: pruning

Median over recorded trials; cost is negative expected utility. Missing or unsuccessful results: –.
